

Abstract

An appendage that is retrofittable to an office chair for
converting the office chair into a computer workplace;
the office chair being characterized by comprising a seat
5 supported by a central column, having a feet assembly
attached thereto;

Wherein the appendage comprises: a chassis coupled to a
seat connector, and a monitor supporting structure;
the seat connector for facilitating connection of said chassis
10 to said central column of said office chair, and the monitor
support structure for supporting a computer monitor thereon.
